

Unfortunately, my son Joey was diagnosed with brain cancer at the young age of 15. He battled cancer for 2 years & even though we had great coverage, there was still out of pocket, deductibles and unforeseen cost that had to be met. We traveled numerous times to Houston & even lived there for weeks while Joey was being treated. All my transportation & hotel expense was reimbursed back to me; I received over 70,000 dollars & I thank God I had Family Heritage.

Every man, woman & child should have a cancer policy.

Joey was a brave young man who never showed fear during his battle & was willing to do anything & go anywhere as he fought a good fight. He wanted to live & frequently told me, "Dad, trust God". That's exactly what we did & Family Heritage helped us afford to give our son the best care.

Sincerely & in Joey's step.
Robert James
